DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, filed 3/29/2007, with respect to claims 1-15 have been fully considered and are persuasive. The 103 rejection of claims 1-15 has been withdrawn. However, regarding the 101 rejection of claims 5, 6, and 13-15, the claims are still rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 5, 6, 13, 14, and 15 still recite a computer program without being encoded on a computer readable medium. Furthermore, the specification does not provide sufficient disclosure for the amendment "A recording medium which stores thereon a computer program executable by a computer" (see claims 5 and 13).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 5, 6, and 13-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 5 and 13

Art Unit: 2611

recite the limitation “A recording medium which stores thereon a computer program executable by a computer”. However, the specification does not provide sufficient disclosure regarding a computer program executable by a computer stored on a recording medium. At most, the specification discloses “It is to be noted that any arbitrary replacement or substitution of the above-described structural components and the steps, expressions replaced or substituted in part or whole between a method and an apparatus as well as addition thereof, and expressions changed to a computer program, recording medium or the like are all effective as and encompassed by the present embodiments. (see page 12, lines 4-10).”

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 5, 6, 13, 14, and 15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 5, 6, 13, 14, and 15 recite a computer program without being encoded on a computer readable medium. MPEP 2106.01 [R-5], Section I states the following:

Similarly, computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs, are not physical “things.” They are neither computer components nor statutory processes, as they are not “acts” being performed.

Art Unit: 2611

Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized. In contrast, a claimed computer-readable medium encoded with a computer program is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer program's functionality to be realized, and is thus statutory. See Lowry, 32 F.3d at 1583-84, 32 USPQ2d at 1035. Accordingly, it is important to distinguish claims that define descriptive material per se from claims that define statutory inventions.

Allowable Subject Matter

6. Claims 1-4 and 7-12 are allowable over prior art references.
